

# **Metadata & API Definition License**

**Effective Date:** April 4, 2026

**Licensor:** Sanousy Howari ("The Provider")

## **1. SCOPE OF LICENSE**

This license governs the "System Metadata," which includes but is not limited to: screen definitions, API endpoint configurations, field mappings, and custom business logic created within the **Unicorn P** environment.

## **2. GRANT OF PERMISSIVE RIGHTS**

The Provider grants the User a perpetual, worldwide, royalty-free, and non-exclusive license to use, modify, and distribute the Metadata created by the User or their designated developers. This is intended to provide the User with full "Data Sovereignty" over their custom implementations.

## **3. NO WARRANTY (THE "MIT/LGPL" SHIELD)**

**THE METADATA AND API DEFINITIONS ARE PROVIDED "AS IS."** To the maximum extent permitted by law, the Provider disclaims all warranties, express or implied, including but not limited to the warranties of merchantability or fitness for a particular purpose.

- The User acknowledges that any logic programmed into the system—whether by the User or a third-party developer—is done at the User's own risk.
- The Provider is not responsible for any system failure, data corruption, or financial discrepancy caused by the User's metadata configurations.

## **4. INDEMNIFICATION**

The User shall indemnify and hold the Provider harmless from any claims, damages, or legal expenses arising from the User's specific API definitions or screen logic. This includes responsibility for ensuring that custom screens and APIs comply with local laws and accounting standards.

## **5. LIMITATION OF LIABILITY**

In no event shall the Provider be liable for any claim, damages, or other liability, whether in an action of contract, tort, or otherwise, arising from, out of, or in connection with the Metadata or the use or other dealings in the Metadata
